

Product Name: CLOSCARE PLUS SELENIUM SUSTAINED ACTION ORAL ANTHELMINTIC AND FLUKICIDE FOR SHEEP

APVMA Approval No: 50323 / 119940

Label Name:	CLOSCARE PLUS SELENIUM SUSTAINED ACTION ORAL ANTHELMINTIC AND FLUKICIDE FOR SHEEP
-------------	---

Signal Headings:	POISON KEEP OUT OF REACH OF CHILDREN FOR ANIMAL TREATMENT ONLY READ SAFETY DIRECTIONS BEFORE OPENING OR USING
------------------	--

Constituent Statements:	37.5 g/L CLOSANTEL 1.2 g/L SODIUM SELENATE (equivalent to 0.5 g/L SELENIUM)
-------------------------	--

Claims:	<p>For the sustained control of Barbers Pole worm (<i>Haemonchus contortus</i>) and control of Liver Fluke (<i>Fasciola hepatica</i>) mature and immature - including six weeks old stages, and Nasal Bot (<i>Oestrus ovis</i>) and aids in control of selenium responsive conditions in sheep.</p> <p>Indications: Closicare plus Selenium contains Closantel, a member of the Salicylanilides group of drenches. It is effective against sensitive strains of the following internal parasites: - adult and immature Barber's pole worms (<i>Haemonchus contortus</i>). Closicare plus Selenium provides sustained protection against re-infestation of Barber's pole worm in sheep for 4 weeks after dosing. - adult and immature liver fluke (<i>Fasciola hepatica</i>) including six week old stages. - all stages of nasal bots (<i>Oestrus ovis</i>) in sheep.</p> <p>Selenium supplementation will prevent white muscle disease. Treat ewes 1 months before lambing and treat lambs at marking. Where selenium responsive ill thrift or selenium responsive scouring are a problem, treat lambs at marking and again 2 months later. Consult your veterinarian to have blood samples taken to assess the selenium status of your flock.</p> <p>Resistance may develop to any drench. Ask your local veterinary practitioner or animal health adviser for recommended parasite management practices for your area to reduce development of resistance. It is advisable that a resistance test be conducted before any parasite treatment is used.</p>

Directions for Use:	
Restraints:	DO NOT USE on ewes which are producing or may in the future produce milk that may be used or processed for human consumption.
Contraindications:	This product is contraindicated for use when selenium intake from pasture is high or selenium is provided by other means (such as top dressing, vaccine, pellets or selenium drenches) if blood selenium levels at treatment are high. Users can determine selenium status by consulting their veterinarian.
Precautions:	Selenium can have toxic effects, particularly in sheep with liver damage that graze in areas where plants that contain pyrrolizidine alkaloids are prevalent.
Side Effects:	
Dosage and Administration:	<p>Closicare plus Selenium dose rate is 1 mL / 5kg body weight. Closicare plus Selenium is ready to use and does not require mixing. Closicare plus Selenium can be used at the recommended doses in sheep of all ages including pregnant ewes.</p> <p>[Dose Volume Table_Closicare plus Se]</p> <p>Sheep in excess of 75 kg to be dosed at 1 mL per 5 kg. A representative sample of animals should be weighed before treatment. Dose the mob according to the heaviest animal by liveweight in the group (ewes, wethers, rams, lambs). Where there is a large variation in size within the group, dose rate should be based on the label directions for each weight range. Do not underdose. Drafting into two or more lines may be appropriate, to avoid excessive overdosing.</p> <p>This section contains file attachment.
