

Goodnature A24 Rat & Mouse Trap

Rats in your ceiling, your walls or your compost. The sight, the sound, just the thought of rats gnawing your wiring, eating your animal feed or scuttling about your home isn't what you want. We want to help you get rid of them.

We started Goodnature for good reason: to see endangered wildlife in New Zealand and around the world flourish again. This means getting on top of a bunch of pests - rats and mice for starters.

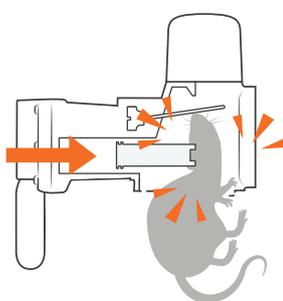

We also want to go about it kindly, without using nasty toxins. That's why we develop humane traps that keep on top of your pest problem for you: automatically resetting to give you constant control, certified humane and non-toxic - which removes the risk of secondary poisoning

How our trap works

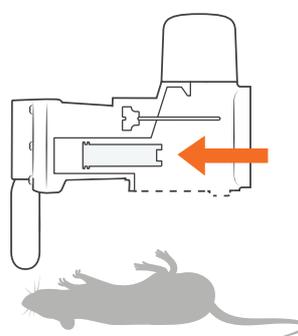

Sniff sniff

Long life lure attracts pests into the trap

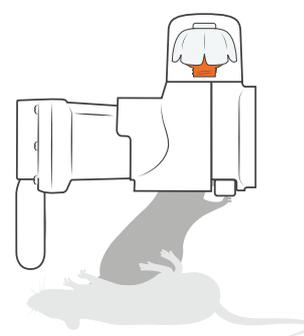

Kapow!

Pest moves trigger, firing the trap

Auto-reset

Pest drops as the trap resets itself automatically

Sniff sniff...

Lure continues to attract for constant control

Why choose Goodnature?

Automatic

Automatically resets itself 24 times before you need to.

Toxin-free

No risk of secondary poisoning

Humane

Kills rats and mice swiftly, because we believe that no creature should suffer.

Easy to use

Easy to set up and move around without getting your hands dirty

Constant control

A trap that's always active gives you constant control against rats and mice.

Made to last

Designed for the toughest environmental conditions

A24 Rat & Mouse Trap with Chirp

Chirp is rat trapping made digital

Chirp works with the A24 Rat & Mouse Trap so you know what your trap has been up to. It works 24/7 counting each pest your trap has killed - recording the day, time and air temperature. When you check your trap, Chirp sends this data to the Chirp App via Bluetooth™.

With Chirp, even if you haven't seen any pests under your trap, you'll know how many you're catching.

Chirp remembers for you

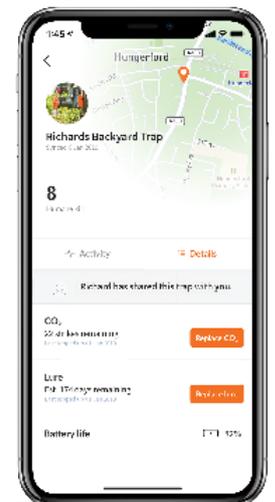

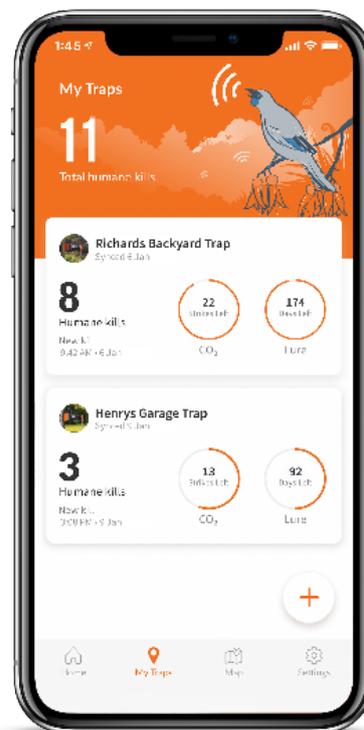

Chirp notifies you when you need to replace your lure and gas, keeping your trap fresh and ready for action, and helping provide constant control against pests.

Share trapping data

Sharing data with the Chirp App is simple and means others can help maintain your trap and monitor your success too. Perfect if you're working with others to solve a pest problem together.

Contribute to conservation

The Chirp App shows you how your individual trapping success adds up to something much bigger. The less pests there are, the better chance native species have to flourish again. As more people switch to Chirp, watch how the heat map in the app changes!

Goodnature Chirp App

With the Goodnature Chirp App you'll have all you need right at your fingertips. The App will guide you through trap installation, how to pair Chirp with your smartphone, remind you about ongoing maintenance and help answer any questions.

Goodnature Product range

Trap kit

A24 Rat & Mouse Trap - Chirp Kit

This kit has everything you need for up to six months of control against rats and mice.

Powered by a gas canister, the A24 Rat & Mouse Trap automatically kills 24 rats or mice - one after the other, before you need to replace the gas canister.

The A24 Trap dispenses fresh non-toxic, chocolate lure automatically for up to six months, keeping your trap attractive to passing rats and mice.

This kit also includes Chirp. Our Bluetooth enabled device that connects to your smartphone, counting each pest your trap has killed so you know you're getting on top of your problem.

The A24 Trap is certified humane.

Kit includes: 1x A24 Trap, 1x Automatic Lure Pump filled with non-toxic lure, 1x Gas canister, 1x Rodent Detector Kit, 1x Chirp Bluetooth cap and access to a team of experts to support you!

Accessory

A24 Trap Stand

The Goodnature A24 Trap Stand is great for when your rodent problem is indoors or you need to move your trap around to target multiple rodent hot spots. It's perfect for when you don't have a tree, post or a wall space to attach the trap to - like gardens, ceilings, sheds or under your sink.

Plus, the tray makes it easy to dispose of dead pests without touching them.

Gas

Gas Canister - 30 Pack

The gas canister is the all-important part which powers your trap.

We chose the highest possible quality made of recyclable steel and a dab of silicone to keep your trap running smoothly. To maximise the life of your trap, we highly recommend you use our Goodnature-branded canisters.

Each canister contains 16 g of CO₂. A single gas canister powers your A24 Rat & Mouse Trap for up to 24 kills.

Lure

Automatic Lure Pump - Chocolate

The Goodnature Automatic Lure Pump ensures your trap always has fresh lure available, increasing your trapping success. It comes filled with our non-toxic, long-life chocolate lure so you're ready to go.

Once installed and activated, the lure pump automatically dispenses fresh long-life lure for up to six months. Totally toxin free means safe to use around pets, wildlife and children and there's no-risk of secondary poisoning.

Lure Pouch 200 g - Chocolate

Goodnature Chocolate Lure is long-life, toxin-free and tastes and smells of chocolate. It's so attractive to rats that 24 out of 24 choose it as their last meal!

Because our lure is toxin-free, it's safe to use around pets, working animals and livestock. The lure can be used to pre-feed the area around your trap, to encourage rats and mice toward the trap.
