

# H2Pro®

## TriSmart

The optimum solution for turf moisture management

### Description

H2Pro TriSmart is formulated with three water management surfactant technologies to provide great water penetration, even water spread through the rootzone and to improve the water holding capacity of sandy rootzones. Researched, formulated and produced in-house by ICL.

### Benefits

- ▀ Highly effective triple action formulation
- ▀ Very effective against localised Dry patch development
- ▀ Even moisture distribution through upper soil profile
- ▀ Greatly reduces irrigation needs

### Characteristics

**Pack size** 5 litre, 120 litre, 200 litre, 500 litre and 1,000 litre

**Formulation type** Liquid

<b>Technology</b>	Surfactant
<b>Longevity</b>	4 weeks* depending on environmental factors
<b>Type</b>	Soil moisture optimiser

## Application rates

### Application information

Full programme application rate 10 L/ha monthly

---

Late start programme application rate 25 L/ha then 10L/ha monthly

---

Water volume 600 - 1,000L/ha

---

Frequency Monthly

---

Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and as the application of our products is beyond our control, ICL cannot be held responsible for any adverse results.

## How to use

## Attention

Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and as the application of our products is beyond our control, ICL cannot be held responsible for any adverse results. Contact your ICL advisor for more detailed advice.
