APPENDIX 2

TEMPLATE FOR RELEVANT LABEL PARTICULARS (RLPs) *(Veterinary Products)*

Select appropriate:

☐ Variation (highlight instructions that are being varied). Approval no. of label being varied **38823 / 60429**

Signal heading:	**FOR ANIMAL TREATMENT ONLY**
Product name:	BLOAT-DRENCH ORAL BLOAT CONTROL
Active constituent/s:	ACTIVE CONSTITUENT: 271 g / L Alcohols, C12-15 ethoxylated
Statement of claims:	BLOAT - DRENCH is ready for use; as an oral drench for individual cattle, for mixing with molasses in bail feeding and to be metered into drinking troughs or drum rollers.
Net contents:	CONTENTS: 5, 20, 200 or 1000 LITRES
Directions for Use Heading:	**DIRECTIONS FOR USE**
Restraints:	
Contraindications:	
Precautions:	
Side effects:	
Dosage & administration: RLP Approved	**Drench Application** BLOAT - DRENCH is ready to use as a drench and requires no further dilution or mixing. Drenching individual animals with 21 mls of BLOAT - DRENCH twice daily will prevent bloat. A suitable time for dairy animals is after each milking. It may be necessary in extreme bloat risk situations to increase the rate of dosage to 42 mls twice daily. **Bail Feeding with Molasses** Where facilities are available in the dairy BLOAT - DRENCH may be mixed at a ratio of 1:1 with molasses and fed at the rate of 55 mls per head twice daily in the bail. Cows which do not drink the mixture should be drenched with BLOAT - DRENCH at the dosage listed in the section above, Drench Application. **Drinking Troughs and Drum Rollers** If adequate metering devices are available BLOAT - DRENCH may be added to drinking troughs or drum rollers to provide cattle with an intake of 42 mls of BLOAT - DRENCH daily. Where there are no metering devices available, allow 42 mls per 15 litres of water trough capacity. As water consumption is variable it may be necessary to adjust the level of BLOAT - DRENCH added to the drinking trough. It is vital that no other source of drinking water be made available.
General directions:	
Withholding Period/s:	**Zero (0) Days**
Trade Advice:	**EXPORT SLAUGHTER INTERVAL (ESI): Zero (0) Days**
Safety Directions:	
First Aid:	If poisoning occurs, contact a doctor or Poisons Information Centre. Phone Australia 131126

Additional user safety:	**MATERIAL SAFETY DATA SHEET** Additional information is listed in the Material Safety Data Sheet which can be obtained from the supplier.
Environmental statements:	**Protection of Wildlife, Fish, Crustaceans and the Environment** Do not contaminate streams, rivers or waterways with the chemical or used containers.
Disposal:	**Disposal** Triple or (preferably) pressure rinse into the medicated water. Do not dispose of undiluted chemicals on-site. Break, crush or puncture and bury empty containers in a local authority landfill. If no landfill is available, bury the containers below 500 mm in a disposal pit specifically marked and set up for this purpose clear of waterways, vegetation and roots. Empty containers and product should not be burnt.
Storage:	**Storage** Store below 30°C (Room Temperature) store in a cool dry place, keep container closed and protect from light.
